

VIRTUALLY SIMPLE AUTOMATED MANAGEMENT ASSISTANT

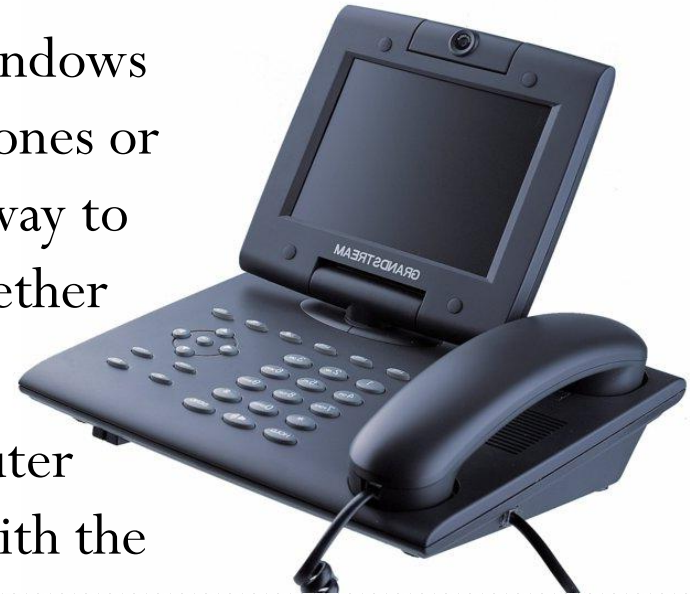

The Ultimate Business Solution

www.vSama.com

VoiP Video telecom services branded by TMI & Associates, Inc. utilizes "Voice over Internet Protocol" to process inbound or outbound calling from your home or office computers or telephone equipment. And, our service includes video to video calls on our network

How it Works

- A complete 3CX Phone System for Windows consists of the server software, soft phones or SIP hardware phones, and a VoiP Gateway to connect your existing phone lines. Together with myVoiPVideo.com
- The system can use the existing computer wiring (and share the network point with the computer) and can be installed on an existing, non-dedicated Windows server or run as a virtual machine. Say goodbye to expensive, proprietary, phone system expansion modules and costly phone bills!

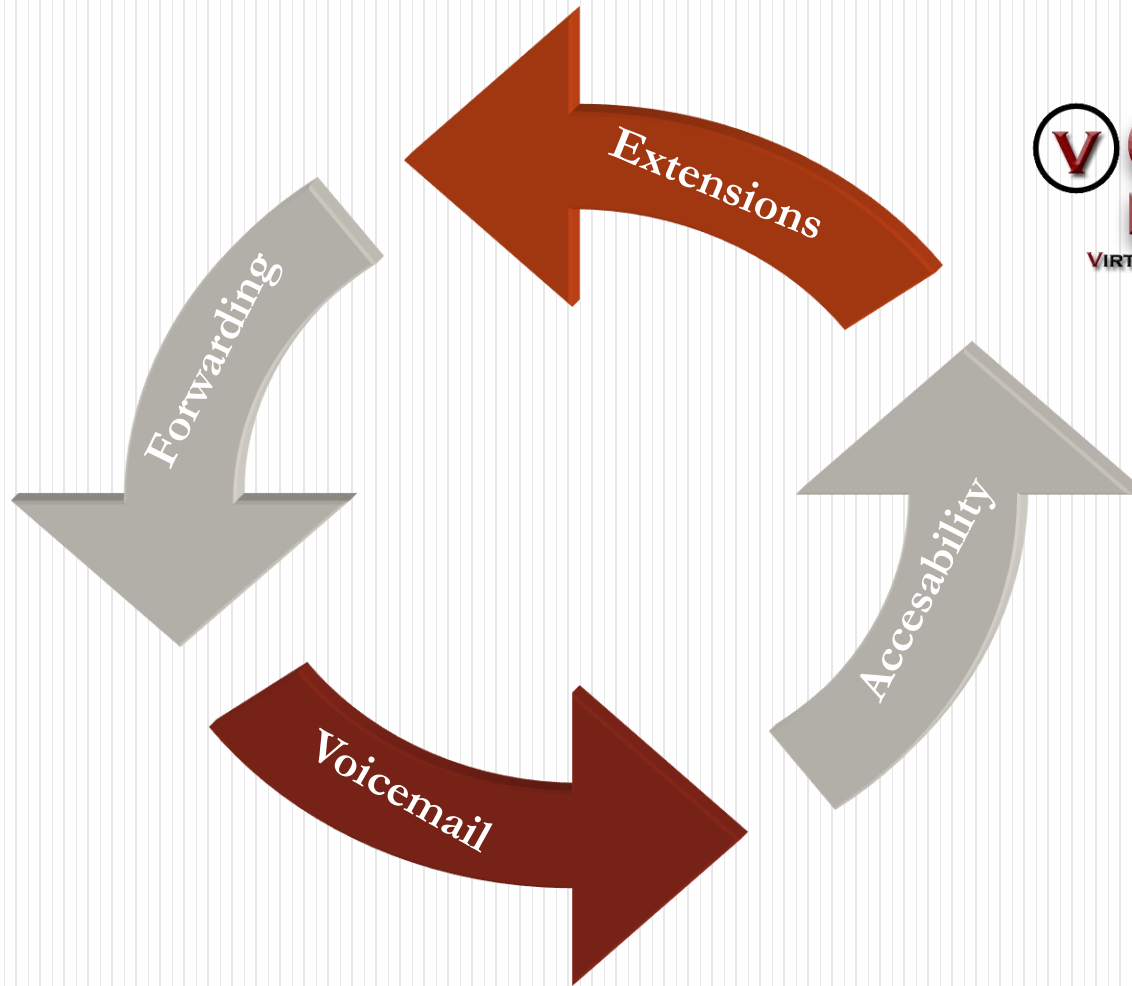

Keep Your Existing Phone Lines With a Voip Gateway

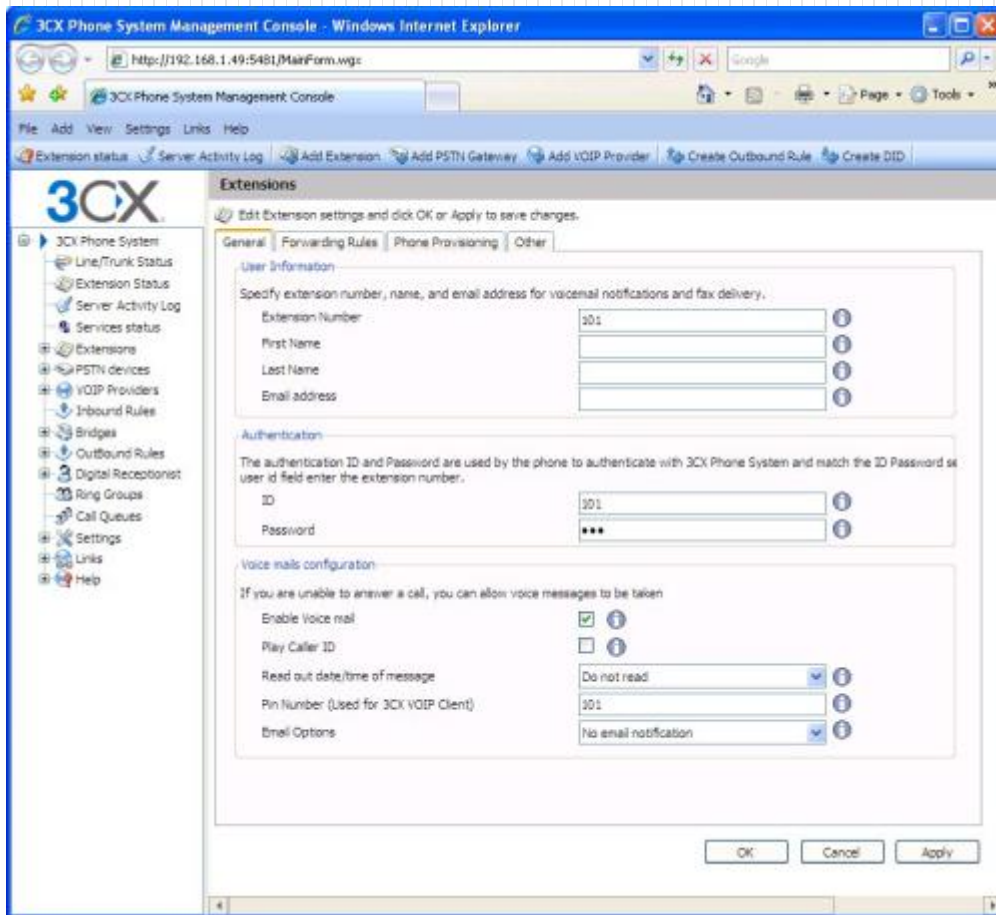

With 3CX Phone System you can continue to make and receive calls on your existing phone lines using a VoIP Gateway. 3CX includes out of the box configurations for leading VoIP Gateways and Sangoma cards. Analog and BRI gateways start at as little as \$300 and an E1/T1 gateway starts at approximately \$1500

Interconnectivity
